FULL STACK RUBY ON RAILS DEVELOPER

Description

Job Summary

Hiring organization
Blackwater Tech

Date posted
July 12, 2024

We are seeking a talented and experienced Full Stack Ruby on Rails Developer to join our team and work on exciting projects. As a Full Stack Developer, you will be responsible for developing and maintaining high-quality web applications using Ruby on Rails. The ideal candidate should have a strong background in Ruby on Rails development, as well as proficiency in other web technologies such as JavaScript, HTML, and CSS.

Responsibilities

Roles & Responsibilities

- Collaborate with cross-functional teams to design, develop, and deploy web applications using Ruby on Rails.
- Write clean, efficient, and maintainable code following best practices and coding standards.
- Develop and maintain unit and integration tests using RSpec to ensure code quality and reliability.
- Implement front-end components using JavaScript, HTML, and CSS to create responsive and user-friendly interfaces.
- Version control using Git, ensuring proper branching, merging, and code review processes.
- Collaborate with UI/UX designers to implement pixel-perfect designs.
- Troubleshoot and debug application issues, ensuring optimal performance and usability.
- Stay up-to-date with the latest industry trends and technologies, making recommendations for continuous improvement.

Qualifications

Experience

- Strong proficiency in Ruby on Rails, **with a minimum of 10 years of hands-on experience.**
- Strong Frontend experience or Angularjs
- Proficiency in JavaScript, HTML, and CSS.
- Solid understanding of version control systems, preferably Git.
- Ability to work in an Agile development environment, collaborating with cross-functional teams.

Job Benefits

Skills Required

- Experience with React or other modern JavaScript frameworks.
- Familiarity with GitLab or other similar CI/CD platforms.
- Knowledge of Cypress or Selenium for automated testing.
- Familiarity with deployment and hosting platforms such as Heroku.
- Proficiency in jQuery or other JavaScript libraries.
- Experience with CircleCI or other continuous integration pipelines.
- Knowledge of DevOps principles and practices.
